- Odkręcić koło zapasowe.
- Przyłożyć hak do boków podłużnic tak, aby otwory (1) pokryły się z otworami w podłużnicach.
- Poprzez otwory od dołu podłużnic wsunąć płaskowniki z nakrętkami i skręcić lekko śrubami M12x35 8.8.
- Poprzez otwory w bokach haka (pkt 1) wykonać otwory Ø12,5w podłużnicach, włożyć do podłużnic płaskowniki z nakrętkami C i skręcić śrubami M12x35 8.8.
- Dokręcić wszystkie śruby z momentem wg tabeli.
- Przykręcić kulę i blachę gniazda elektrycznego.
- Podłączyć instalację elektryczną.
- Zamontować koło zapasowe.

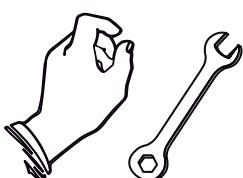

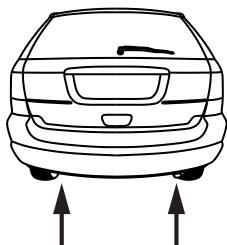

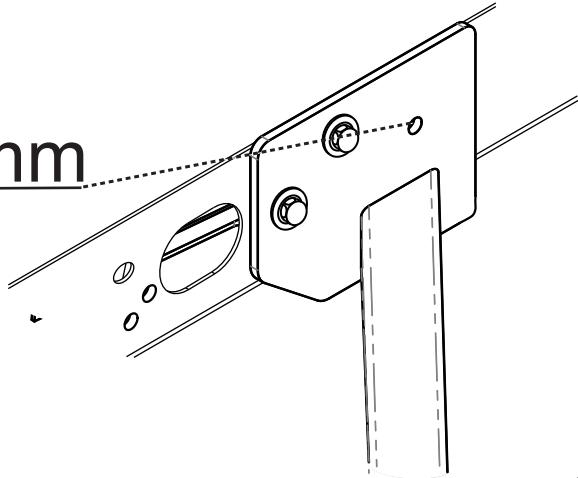

- Unscrew the spare wheel.
- Put the tow bar to the sides of the metal clamps in this way, so the holes (1) agree with the holes in the metal clamps.
- Insert the plates with nuts, through the holes of the bottom of the metal clamps, and screw slightly with bolts M12x35 8.8.
- Drill the holes Ø12,5 in the metal clamps, through the holes in the sides of the tow bar (point 1), insert the plates with nuts C in the metal clamps and screw with bolts M12x35 8.8.
- Tighten all the bolts according to the torque setting- see the table.
- Fix the ball and electric plate.
- Connect the electric wires.
- Assemble the spare wheel.

- Dévisser la roue de secours.
- Fixer le crochet d'attelage aux bords des longerons de sorte que les trous (1) du crochet d'attelage soient alignés avec les trous des longerons.
- Enfiler les fourrures métalliques avec des écrous dans des trous du bas des longerons et visser légèrement à l'aide des boulons M12x40 8.8.
- À travers les trous dans des côtés du crochet (point 1), faire les trous Ø12,5 dans les longerons, enfiler les fourrures métalliques avec des écrous C dans les longerons et serrer à l'aide des boulons M12x40 8.8.
- Serrer tous les boulons avec un couple de serrage selon tableau.
- Visser le crochet d'attelage et socle de prise électrique.
- Raccorder le circuit électrique.
- Monter la roue de secours.
